The EPA site where verified data will be posted is [www2.epa.gov/goldkingmine](http://www2.epa.gov/goldkingmine) under heading data (bottom of page). Under that heading there is a link for Colorado data. Once the data for New Mexico data has been verified it will be added.

**Subject:** EPA data website for Gold King Mine

Hi Angela,

This is Eric from NM DOH. I'm trying to find the website that EPA uses to upload latest test results, but I can't seem to find it. When I go to the Gold Mine EPA site it references such a site but I can't find the data anywhere.

Can you please direct me to the proper site location? Also, we are most interested in sediment data as it comes available.

Thanks again for all you're doing!

Best,

Eric Coker, M.S.
